*The % has been derived by dividing the Revenue from operations with the total revenue generated from operations divided by of the company in the relevant year as mentioned in the Profit and Loss Statement as given in restated financials of the company.

Such geographical concentration of our business in these regions heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in these regions which may adversely affect our business prospects, financial conditions and results of operations. We may not be able to leverage our experience in such regions to expand our operations in other parts of India, due to factors such as competition, culture, regulatory regimes, business practices and customs, industry needs, transportation, in other markets where we may expand our operations may differ from those in such regions, and our experience in these regions may not be applicable to other markets. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national players, but also local players who might have an established local presence, are more familiar with local regulations, business practices and industry needs, have stronger relationships with local dealers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into areas outside such markets may adversely affect our business prospects, financial conditions and results of operations. While our management has faith that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we may face and should not rely on our results of operations for any prior periods as an indication of our future performance.

Further, we have entered into non-compete agreement with the said entity. We cannot assure that our Promoter who has common interest in said entity will not favour the interest of the said entity. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company and our Group Company in circumstances where our respective interests' conflict. In cases of conflict, our Promoter may favour other companies in which our Promoter has interest. There can be no assurance that our Promoter or our Group Company or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours.

- 4. Several of our key raw materials and components are sourced from a limited group of third-party suppliers giving rise to supplier concentration risks. Any restrictions in supply or defects in quality could cause delays in project construction or implementation and impair our ability to provide our services to customers at a price that is profitable to us, which could have a material adverse effect on our business, financial condition and results of operations.**

Our failure to obtain raw materials and components that meet our quality, quantity and cost requirements in a timely manner could interrupt or impair our ability to provide our services or increase our operating costs. We depend on a limited number of suppliers for our key raw materials. As a result, any failure of any of our suppliers to perform could disrupt our global supply chain and materially affect our operations. The import and export restrictions; transportation and related infrastructure failures; or deterioration in diplomatic relationships and bilateral trade disputes could increase supply costs, which could affect our operations and financial condition.

Primarily due to increases in working capital requirement as a result of an increase in the scale of our business. Any negative cash outflows from operating activities over extended periods, or significant cash outflows in the short term from investing and financing activities, could have an adverse impact on our cash flow requirements, business operations and growth plans. As a result, our cash flows, business, future financial performance and results of operations could be adversely affected. For further details, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Cash Flows” on page 209 of this Red Herring Prospectus.

6. Labour-Intensive Operations and the Potential Risks of Workforce Disruptions.

As a labour-intensive business, we depend heavily on our workforce to ensure smooth production and manufacturing processes. Any disruptions, such as strikes, lockouts, or industrial action, could have a considerable negative impact on our financial health, operational efficiency, and reputation. In the past, the Company has not encountered any issues such as strikes, lockouts, or similar disruptions. While we have not encountered such issues in the past, the risk remains significant. A strike or lockout could halt production, delay deliveries, disrupt supply chains, and hinder our ability to meet customer demands, leading to revenue losses and increased operational costs.

Prolonged workforce disruptions can also harm employee morale, lower productivity, and damage our reputation. Clients may perceive delays or quality issues as a result of labour disputes, which could erode the trust we’ve built with stakeholders. In a highly competitive market, maintaining strong client relationships and delivering on time is critical, and any labour unrest may weaken our standing in the industry.

To address this potential risk, we prioritize open communication with our employees and work to ensure a positive working environment. We focus on fair and transparent management to prevent disputes, while preparing contingency

plans, such as maintaining reserves of key materials and products. Recognizing this risk is crucial to safeguarding our operations and ensuring the continued growth of our company.

7. *We may continue to derive a material portion of our revenue from our top five customers and our financial dependence on our top five customers poses a potential risk. A reduction in business from these top five customers or any other major clients could have negative implications for both our revenue and profitability.*

At present, we derive most of our revenues from the sale of products from limited number of customers. Any decline in our quality standards, any change in the demand for our products by the customers may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability. However, the composition and revenue generated from these clients might change as we continue to add new clients in normal course of business.

Our top ten customers contribute 44.37%, 33.75%, 33.06%, 30.16% of total revenue for operation for Two months ended May 31, 2025, the year ended March 31, 2025, 2024 and 2023 respectively.

Our company is primarily engaged in the manufacturing of Structural Steel. Our business operations are highly dependent on our customers and the loss of any of our customers may adversely affect our sales and consequently on our business and results of operations. While we typically have long term relationships with our customers, we have not entered into long term agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers and suppliers. The actual sales by our Company may differ from the estimates of our management due to the absence of long-term agreements. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Any decline in our quality standards, growing competition and any change in the demand, may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenues and results of operations.

17. We could become liable to customers, suffer adverse publicity and incur substantial costs as a result of defects in our products, which in turn could adversely affect our business operations and our sales could be diminished if we are associated with negative publicity.

Any failure or defect in our products could result in a claim against us for damages, regardless of our responsibility for such a failure or defect. Although we attempt to maintain quality standards, we cannot assure that all our products would be of uniform quality, which in turn could adversely affect our business operations and our sales could be diminished if we are associated with negative publicity. However, no such instances occurred in the past.

18. The demand and pricing in the steel industry is volatile and are sensitive to the cyclical nature of the industries it serves. A decrease in steel prices may have adverse effect on our business, results of operations margins and financial condition.

Steel prices fluctuate based on a number of factors, such as the availability and cost of raw material inputs, fluctuations in domestic and international demand and supply of steel and steel products, worldwide production and capacity, fluctuation in the volume of steel imports, transportation costs, protective trade measures and various social and political factors. When downturn occur in these economies /sectors, we may experience decreased demand for our products, which may lead to a decrease in steel prices and in turn, have an adverse effect on our revenue, margins, financial condition and prospects. In addition, substantial decreases in steel prices during period of economic weakness have not always been balanced by commensurate price increases during periods of economic strength. Any sustained price recovery will most likely require a broad economic recovery, in order to underpin an increase in real demand for steel products by end users.

19. We have not entered into any long-term agreements with our suppliers for supply of items and accordingly may face disruptions in supply from our current suppliers

We manufacture structural steel products. For manufacturing the products, we have to purchase many items like Ingots, Billets, Coal, etc from the reputed and renowned suppliers. Identifying a suitable supplier involves a process that requires us to become satisfied with their quality control, consistency, responsiveness and service, financial stability and other ethical practices and specifically they must be reputed suppliers. Typically, we do not enter into long term contracts with our suppliers and prices for these items are normally based on the quotes we receive from various approved suppliers but key terms—including payment conditions, jurisdiction for arbitration, and available legal remedies—are clearly stated on the respective invoices. This practice ensures that any disputes arising with suppliers can be addressed and resolved effectively. Any unexpected price fluctuations after placement of orders, shortage, delay in delivery, quality defects, or any factors beyond our control may result in an interruption in the supply of such items which is critical to our business. Any delay, interruption or increased cost in the supply of any items thereof pertaining to our project arising from a lack of long-term contracts could have an adverse effect on our ability to meet our targets and client satisfaction from our service and our business, financial performance and cash flows may be adversely affected. Further, we may not be able to locate alternative suppliers of these items with approved specification on terms acceptable to us, or at all.

20. We face competition in our business from domestic competitors. Such competition would have an adverse impact on our business and financial performance.

The steel industry is highly competitive, posing significant challenges to our operations and financial stability. Our performance and financial health are notably vulnerable to competitive pricing dynamics and other market factors. Intensifying competition may lead to pricing pressures, diminished profit margins, market share losses, or an inability to expand our market presence, all of which could impair our business and financial outcomes. It's uncertain whether we can effectively contend with our rivals in the future, and any failure to do so could substantially undermine our business, financial well-being, and operational results.

21. Our capital subscription related payment proofs are not able to trace by the company and the shareholders of the company.

Our company, along with its shareholders, is currently facing challenges in tracing the payment proofs and other supporting documents related to capital subscriptions for our shares. The allotment of shares necessitates the actual transfer of funds from the acquirer or allatee to the company. To verify this allotment, bank statements or other supporting documents from the shareholders are essential.

Unfortunately, both our company and the shareholders have been unable to locate the required bank statements that would serve as evidence of these fund transfers. This lack of documentation raises concerns regarding the authenticity of the capital raised and may affect our financial reporting and compliance obligations.

Investors should be aware that this uncertainty could impact their assessment of our financial stability and operational integrity. The inability to provide verifiable proof of capital contributions may also lead to potential regulatory scrutiny or complications in future funding efforts.

22. Certain documents relating to transfer of shares/business to our corporate promoter is not traceable.

Our Company faces challenges in tracing critical documentation pertaining to the transfer of shares to our corporate promoter, M/s. Well Plan Tradelink Pvt Ltd., including records of share transfers and associated agreements. Additionally, essential documents related to the transfer of shares - such as the share Transfer Agreement, and regulatory registrations are currently untraceable.

As a result, we cannot assure you that no action will be initiated against us in the future or that we will not be subjected to penalties or other adverse consequences by the relevant authorities. Furthermore, there can be no assurance that there will be no non-compliance issues or that our Company will not face regulatory or legal challenges as a result of the missing documentation.

23. Certain delays, discrepancies and Omissions have been detected in our statutory records, as well as in records related to the submission of returns to the concerned Registrar of Companies

In the past, there have been some instances of delays, discrepancies and Omissions in our statutory records, as well as in records related to the submission of returns to the concerned Registrar of Companies which includes inadvertently filed incorrect information in the forms filed with the Registrar of Companies.

However, it cannot be assured that even in future no such penalty will be levied. Therefore, if the authorities impose monetary penalties on us or take certain punitive actions against our Company or its Directors / Officers in relation to the same, our business, financial condition and results of operations could be adversely affected.

24. Our operations may cause injury to people or property and therefore could subject us to significant disruptions in our business, legal and regulatory actions, costs and liabilities which could materially and adversely affect our business, financial condition and results of operations.

Our operations could cause injury to people or property and therefore, could subject us to significant business disruptions. The same could expose us to legal and regulatory actions and we could be held liable for costs and/or damages if the same were to be decided against us. The same can adversely affect our business, financial condition and impact our operations.

25. Failure to manage our stocks could have an adverse effect on our net sales, profitability, cash flow and liquidity.

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirement accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of supply or an accumulation of excess inventory. The excess stocks will need storage space and block our liquidity resulting in loss.

26. Our Company has availed unsecured loan which are repayable on demand. Any demand from the lenders for repayment of such unsecured loan may affect our financial condition.

As on May 31, 2025, Our Company has, as per the restated Financial Information, availed total sum of ₹ 688.95 Lakh unsecured loan from Directors, Banks, Body Corporates and others which may be recalled at any time. Sudden recall may disrupt our operations and also may force us to opt for funding at unviable terms resulting in higher financial burden. Further, we will not be able to raise funds at short notice and thus result in shortage of fund. For further details, please refer to the section —Financial Information - Long-Term Borrowing & Short-Term Borrowing on page 208 of this Red Herring Prospectus. Any demand for the repayment of such unsecured loan, may affect our cash flow and financial condition.

27. Our indebtedness, including various conditions and restrictive covenants imposed on us under our financing agreements and could adversely affect our ability to grow our business or react to changes in our business environment.

As of May 31, 2025, we had total outstanding financial indebtedness of ₹ 2069.85 lakhs (including both long term borrowing and short-term borrowings). Failure to meet these conditions or obtain these consents could have significant consequences on our business and operations. These covenants vary depending on the requirements of the financial institution extending such loan and the conditions negotiated under each financing agreement. While we have received all relevant consents required for the purposes of this issue and have complied with these covenants, a failure to comply with such covenants in the future may restrict or delay certain actions or initiatives that we may propose to take from time to time. While we have not defaulted on any covenants in financing agreements in the past three Fiscals, we cannot assure you that this will continue to be the case in the future.

If the obligations under any of our financing documents are accelerated, we may have to dedicate a portion of our cash flow from operations to make payments under such financing documents, thereby reducing the availability of cash for our working capital requirements and other general corporate purposes. In addition, a default by us under the terms of any financing agreement may also trigger us defaulter under some of our other financing agreements, or any other agreements or instruments of our containing defaulter provisions, which may individually or in aggregate, have an adverse effect on our operations, financial position and any credit ratings. For further information regarding our borrowings, see “Financial Indebtedness” on page 221 of this Red Herring Prospectus.

Changes to government policies may create restrictions on our ability to raise capital. Further, we are susceptible to changes in interest rates and the risks arising therefrom. Certain of our financing agreements provide for interest at variable rates with a provision for the periodic resetting of interest rates. Further, under certain of our financing agreements, the lenders are entitled to charge the applicable rate of interest, which is a combination of a base rate/MCLR rate that depends upon the policies of the RBI and a contractually agreed spread, and in the event of an adverse change in our Company’s credit risk rating. Further, in recent years, the GoI has taken measures to control inflation, which included tightening the monetary policy by raising interest rates. As such, any increase in interest rates may have an adverse effect on our business, results of operations, cash flows, and financial condition.

28. We require certain approvals, licenses, registrations and permits for our business and the failure to obtain or renew them in a timely manner may adversely affect our operations.

Our Company is obligated to maintain various statutory and regulatory registrations, licenses, permits, and approvals necessary for our operations. In the future, we will need to renew existing registrations and approvals, as well as acquire new ones for any proposed expansions. While we are confident in our ability to fulfil these requirements, there is no guarantee that the relevant authorities will renew or issue registrations or approvals within our anticipated time frame, or at all. Failure to obtain or renew these authorizations within statutory deadlines may result in penalties. Any inability to secure or maintain necessary registrations or approvals could disrupt our operations and significantly impact our revenues, profits, and overall operations.

Moreover, certain statutory licenses and approvals obtained for conducting our business are subject to specific terms, conditions, and covenants that our company must adhere to. Non-compliance with these obligations may result in penalties and could lead to the cancellation of licenses and approvals, further negatively impacting our business, financial stability, and operational results.

For further details see Chapter on “Key Industry Regulations and Policies” and “Government and Other Approvals” on page 161 and 227 of this Red Herring Prospectus respectively. We do business with our customers on purchase order basis and do not have long-term contracts with most of them.

Our business is conducted on purchase order basis, depending on the requirements of the client preferences and demand. We do not have long-term contracts with our customers and there can be no assurance that we will continue to receive repeat orders from any of them. Further, even if we were to continue receiving orders from our clients, there can be no assurance that they will be on the same terms, and the new terms may be less favourable to us than those under the present terms.

29. The Objects of the Issue for which funds are being raised, are based on our management estimates and any bank or financial institution or any independent agency has not appraised the same. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titles “Objects of the Issue”.

The fund requirement and deployment, as mentioned in the “**Objects of the Issue**” on page 105 of this Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors. However, a Monitoring Agency, has been appointed in compliance with SEBI ICDR Regulations for monitoring the utilisation of the Net Proceeds. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans.

30. We intend to utilize a portion of the Net Proceeds for funding our capital expenditure requirements. We are yet to place orders 100% of the capital expenditure, as specified in the Objects of the Issue chapter. Any delay in procurement of such capital expenditure may delay the schedule of implementation and may also lead to increase in cost of this capital expenditure, further affecting our revenue and profitability.

We are yet to place orders for 100% capital expenditure as detailed in the “Objects of the Issue” beginning on page of this Red Herring Prospectus. We have not entered into any definitive agreements to utilize the Net Proceeds for this object of the issue and have relied on the quotations received from third parties for estimation of the cost. While we have obtained quotations from various vendors in relation to such capital expenditure, most of these quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. We cannot assure you that we will be able to undertake such capital expenditure within the cost indicated by such quotations or that there will not be cost escalations. Delay in procurement of the same can cause time and cost overrun in the implementation of our proposed expansion and can also compel us to buy the same at a higher price, thus causing the budgeted cost to vary. As a result, our business, financial condition, results of operations and prospects could be materially and adversely affected.

31. Any variation in the utilisation of the Net Proceeds would be subject to certain compliance requirements, including prior shareholders' approval.

Our Company intends to use Net Proceeds raised pursuant to the Fresh Issue in the manner set out in the section titled “**Objects of the Issue**” on page 105 of this Red Herring Prospectus. In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the Net Proceeds as disclosed in this Red Herring Prospectus without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations.

In light of these factors, we may not be able to undertake variation of Objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

32. If we fail to maintain an effective system of internal controls, we may not be able to successfully manage, or accurately report, our financial risks. Despite our internal control systems, we may be exposed to operational risks, including fraud, petty theft and embezzlement, which may adversely affect our reputation, business, financial condition, results of operations and cash flows.

Effective internal controls are necessary for us to prepare reliable financial reports and effectively avoid fraud. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may deteriorate over time, due to evolving business conditions. We cannot assure you that deficiencies in our internal controls will not arise in the future, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls. Any inability on our part to adequately detect, rectify or mitigate any such deficiencies in our internal controls may affect ability to accurately report, or successfully manage, our financial risks, and to avoid fraud, which may in turn adversely affect our business, financial condition or results of operations. Further, given the high volume of transactions we process on a daily basis, notwithstanding the internal controls that we have in place, we may be exposed to the risk of fraud or other misconduct by employees, contractors, or customers.

Fraud and other misconduct can be difficult to detect and deter. Certain instances of fraud and misconduct may go unnoticed or may only be discovered and successfully rectified after substantial delays. Even when we discover such instances of fraud or theft and pursue them to the full extent of the law or with our insurance carriers, there can be no assurance that we will recover any of the amounts involved in these cases. In addition, our dependence upon automated systems to record and process transactions may further increase the risk that technical system flaws or employee.

33. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including termination of our contracts, regulatory sanctions and serious harm to our reputation. In the past we have not encountered issues such as strikes, lockouts etc. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and other professionals, agents and / or technicians may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition and results of operations could be adversely affected.

34. If we are unable to manage our growth effectively and further expand into new markets our business, future financial performance and results of operations could be materially and adversely affected.

The success of our business will depend on our ability to effectively implement our business and growth strategy. As part of our growth strategy, we aim to, among other things, continue to grow our businesses as and when

opportunities exist including by continuing to strengthen our existing product portfolio with attractive growth and profitability prospects, to strive for cost efficiency, attracting and retaining talented employees and focusing on consistently meeting quality standards. As we continue to grow our business and expand into newer markets, we may face several challenges, including • acquiring new customers; • identifying customer requirements and preferences in such markets; • obtaining approvals and certifications for our products in such jurisdictions; • making accurate assessments of the resources we will require; • preserving a uniform culture, values and work environment; • developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, internal control and other internal systems; • recruiting, training and retaining sufficient skilled management, technical and marketing personnel; • maintaining high levels of customer satisfaction; and • adhering to expected performance and quality standards. In pursuing our growth strategy, we will require additional capital investments and cash outlays, which may have a material impact on our cash flows and results of operations. Our operating expenses and capital requirements may increase significantly pursuant to our expansion plans. Our ability to manage our growth effectively requires us to forecast accurately our sales, growth and to expend funds to improve our operational, financial and management controls, reporting systems and procedures. An inability to implement our future business plan, manage our growth effectively, further expand into new markets or failure to secure the required funding on favourable terms or at all could have a material and adverse effect on our business, future financial performance and results of operations.

35. Pricing pressure from customers may adversely affect our gross margin, profitability and ability to increase our prices.

Our customers often pursue price reduction initiatives and objectives with their suppliers including us. Adopting cost cutting measures while maintaining stringent quality standards may lead to a decrease in our margins, which may have a material adverse effect on our business, financial condition, results of operations and future prospects. Our customers typically negotiate for larger discounts in price as the volume of their orders increases. If we are unable to efficiently generate sufficient cost savings in the future to offset price reductions or if there is any reduction in consumer demand for consumer goods, our sales, gross margin and profitability may reduce, which may have a material adverse effect on our business, financial condition, results of operations and future prospects.

36. We are subject to strict quality requirements and any product defect issues or failure by us or our suppliers to comply with quality standards may lead to the cancellation of existing and future orders, recalls and exposure to potential product liability claims.

We face an inherent business risk of exposure to product defects and subsequent liability claims if the use of any of our products results in personal injury or property damage. We may not be able to meet regulatory relevant quality standards in India, or the quality standards imposed by our customers which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Company has manufactured and supplied products in accordance with IS 2062:2011 Grade E-250A to ensure quality assurance. Additionally, the Company has a dedicated Quality Department that reviews and maintains inspection reports for every batch of products manufactured. If any of our products do not meet regulatory standards or are defective, we may be, inter alia, (i) responsible for damages relating to any defective products, (ii) required to replace, recall or redesign such products or (iii) incur significant costs to defend any such claims. The failure by us or any of our suppliers to achieve or maintain compliance with regulatory requirements or quality standards may disrupt our ability to supply products sufficient to meet demand until compliance is achieved or, until a new supplier has been identified and evaluated. There is no assurance that our products will always meet the satisfaction of our customers' quality standards. Our failure to comply with applicable regulations could cause adverse consequences to be imposed on us, including fines, injunctions, civil penalties, the refusal of regulatory authorities to grant approvals or renewal, delays, suspensions or withdrawal of approvals, license revocation, seizures or recalls of products, operating restrictions and criminal prosecutions, all of which could harm our business. There can be no assurance that if we need to engage new suppliers to satisfy our business requirement, we will be able to locate new suppliers in compliance with regulatory requirements in a timely manner, or at all. Failure to do so could lead to the cancellation of existing and future orders and have a material adverse effect on our business and revenue. However, no such instances occurred in the past.

37. Any increase in interest rates would have an adverse effect on our results of operations and will expose our Company to interest rate risks.

We are dependent upon the availability of equity, cash balances and debt financing to fund our operations and growth. Any fluctuations in interest rates may directly impact the interest costs of such loans and, in particular, any increase in interest rates could adversely affect our results of operations. Furthermore, our indebtedness means that a material portion of our expected cash flow may be required to be dedicated to the payment of interest on our indebtedness, thereby reducing the funds available to us for use in our general business operations. If interest rates increase, our interest payments will increase and our ability to obtain additional debt and non-fund-based facilities could be adversely affected with a concurrent adverse effect on our business, financial condition and results of operations. For further details, please refer chapter titled "Financial Indebtedness" beginning on page 221 of this Red Herring Prospectus.

38. *We are exposed to counterparty credit risk and any delay in receiving payments or non-receipt of payments may adversely impact our results of operations.*

We are subject to counterparty credit risk and a significant delay in receiving large payments or non-receipt of large payments may adversely impact our results of operations. Our operations involve extending credit to our customers in respect of sale of our products and consequently, we face the risk of the uncertainty regarding the receipt of these outstanding amounts. Consequently, we face the risk of the uncertainty regarding the receipt of these outstanding amounts. As a result of such industry conditions, we have and may continue to have high levels of outstanding receivables. There is no assurance that we will accurately assess the creditworthiness of our customers. Further, macroeconomic conditions which are beyond our control, such as a potential credit crisis in the global financial system, could also result in financial difficulties for our customers, including limited access to the credit markets, insolvency or bankruptcy. Such conditions could cause our customers to delay payment, request modifications of their payment terms, or default on their payment obligations to us, all of which could increase our receivables. Timely collection of dues from customers also depends on our ability to complete our contractual commitments and subsequently bill for and collect from our clients. While we have not faced such incidents in the past, if we are unable to meet our contractual obligations, we may experience delays in the collection of, or be unable to collect, our customer balances, which could adversely affect our results of operations and cash flows.

39. *Disruption of logistics and transportation services could impact the ability of our suppliers to deliver raw materials or our ability to deliver products to our customers and/ or increase our transportation costs, which may adversely affect our operations.*

We utilize third party transportation services for transportation of raw materials and our products from/ to our suppliers and customers. Transportation involves risks, including, collision, grounding, storm, fire, explosion, lightning, political instability and operating restrictions/ lockdown. Any delay or disruption caused to the transportation of raw materials or our products could adversely impact our ability to procure the raw materials as well as to meet the delivery schedule of our products in an economical manner. To ensure timely delivery of our products, we may also be required to maintain relatively high level of inventory of raw materials and this may also resultantly increase our cost.

40. *We are dependent on our management team and key personnel /senior managerial personnel and the loss of any key team member may adversely affect our business performance.*

Our management team and key personnel / senior managerial personnel have been instrumental in the growth and development of our Company. Further as being KMP, they have intrinsically involved in our business operations. He played a significant role in the emerging and development of our business. Any decline in our relationship with our management team and key personnel/ senior managerial personnel may have an adverse effect on our business, results of operations, financial condition and cash flows.

In particular, the active involvement of our management team and key personnel in our operations, including through strategy, direction and relationships have been integral to our development and business. The loss of any of these persons would have a material adverse effect on our operations.

Further, our businesses are dependent upon a core management team which oversees the day-to-day operations, strategy and growth of our business. Our success is largely dependent on our management team which ensures the implementation of our strategy. If one or more members of our key management team were unable or unwilling to continue in their present positions, such persons would be difficult to replace and our business, results of operations, financial condition, cash flows and prospects could be adversely affected.

Our failure to successfully manage our personnel needs could materially and adversely affect our business, results of operations, financial condition and cash flows. Moreover, if any of our key professional employees were to join an existing competitor or form a competing company or otherwise leave, it could lead to setbacks in the implementation of our plans and strategy. Our failure to successfully manage our employees' needs could materially adversely affect our business, results of operations, financial condition, cash flows and prospects. These risks could be heightened to the extent we invest in businesses or geographical regions in which we have limited experience. If we are not able to address these risks, our business, results of operations, financial condition and cash flows could be adversely affected.

41. Our insurance coverage may not be adequate to protect us against certain operating hazards and this could affect our business.

We are insured for a number of the risks associated with our several businesses, such as insurance cover against loss or damage by fire, theft etc. We believe we have got our assets adequately insured, to the extent that we suffer any loss or damage that is not covered by insurance or exceeds our insurance coverage, our business could be affected.

There are various other types of risks and losses for which we are not insured, such as loss of business, environmental liabilities and natural disasters, because they are either uninsurable or not insurable on commercially acceptable terms. we could incur liabilities, lose capital invested in that property or lose the anticipated future income derived from that business or property, while remaining obligated for any operational or financial obligation. Any such loss could result in a material adverse effect on our financial condition and results of operations. However, the Company has not obtained insurance coverage for all its premises. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed.

If we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected. Further, there is no assurance that the insurance premium payable by us will be commercially viable or justifiable.

42. We have not made any dividend payments in the past and our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements.

In the past, we have not made dividend payments to the shareholders of our Company. The amount of our future dividend payments, if any, will depend upon various factors including our future earnings, financial condition, cash flows and requirement to fund operations and expansion of the business. There can be no assurance that we will be able to declare dividends. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors. For further details, please refer "Dividend Policy" on page 207 of this Red Herring Prospectus.

Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company has entered presently and may enter into future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof.

Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details regarding our dividend policy, please see “Dividend Policy” on page no 207 of this Red Herring Prospectus.

43. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of the Equity Shares have been based on many factor and may not be indicative of the Market Price. 44. *Our business activities are exposed to fluctuations in the prices of raw materials.*

Our Company is dependent on third party suppliers for the products. We are exposed to fluctuations in the prices of these raw materials as well as its unavailability, particularly as we typically do not enter into any long-term supply agreements with our suppliers for raw materials. Our major requirement is met in the spot market. We may be unable to control the factors affecting the price at which we procure the raw materials for products we get manufactured. We also face the risks associated with compensating for or passing on such increase in our cost of trades on account of such fluctuations in prices to our customers. Upward fluctuations in the prices of traded goods may thereby affect our margins and profitability, resulting in a material adverse effect on our business, financial condition and results of operations. Though we enjoy favourable terms from the suppliers both in prices as well as in supplies, our inability to obtain high quality materials in a timely and cost-effective manner would cause delays in our production/trade cycles and delivery schedules, which may result in the loss of our customers and revenues.

45. *Our Promoters and members of our Promoter Group will continue to retain majority control in the Company after the Issue, which will enable them to influence the outcome of matters submitted to shareholders for approval.*

Upon completion of this Issue, our Promoters and members of the Promoter Group will continue to have substantial shareholding of our post-Issue equity share capital. As a result, the Promoter & Promoter Group will have the ability to control our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company’s best interest. In addition, for so long as the Promoters and Promoter Group continue to exercise significant control over the Company, they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. The Promoters and members of the Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which we or our other shareholders do not agree.

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

56. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares has been determined by book building method. This price is based on numerous factors (For further information, refer the chapter titled "Basis for Issue Price" on page 121 of this Red Herring Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. Among the factors that affect our share price including but not limited to the following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

EXTERNAL RISK FACTORS

57. *An investment in the Equity Shares is subject to general risk related to investments in Indian Companies.*

Our Company is incorporated in India and all of our assets and employees are located in India. Consequently, our business, results of operations, financial condition and the market price of the Equity Shares will be affected by changes in interest rates in India, policies of the Government of India, including taxation policies along with policies relating to industry, political, social and economic developments affecting India.

58. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares has been determined by fixed price method. The price is based on numerous factors (For further information, please refer chapter titled “Basis for Issue Price” beginning on page 121 of this Red Herring Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- changes in revenue or earnings estimates or publication of research reports by analysts;
- results of operations that vary from those of our competitors;
- speculation in the press or investment community;
- new laws and governmental regulations applicable to our industry;
- future sales of the Equity Shares by our shareholders;
- general market conditions; and
- domestic and international economic, legal and regulatory factors unrelated to our performance.

59. The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined in consultation with Lead Manager in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

60. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the BSE SME Platform in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the BSE SME. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

61. Any future issuance of Equity Shares may dilute your shareholding and sale of our Equity Shares by our Promoters or other shareholders may adversely affect the trading price of the Equity Shares.

Any future equity issuances by us, including in a primary offering, may lead to the dilution of investors’ shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

62. There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder’s ability to sell for the price at which it can sell, equity shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares.

The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

63. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws and regulations, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. A securities transaction tax ("STT") is levied on and collected by an Indian stock exchange on which equity shares are sold. Any capital gain exceeding ₹100,000, realized on the sale of equity shares held for more than 12 months immediately preceding the date of transfer, which are sold using any other platform other than on a recognized stock exchange and on which no STT has been paid, are subject to long-term capital gains tax in India.

The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020 and clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. The Finance Act, 2020, has, among others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, that such dividends not be exempt in the hands of the shareholders, both resident as well as non-resident, and that such dividends likely be subject to tax deduction at source.

The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. In cases where the seller is a non-resident, capital gains arising from the sale of the equity shares will be partially or wholly exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Historically, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the equity shares.

Further, we cannot predict whether any tax laws or other regulations impacting it will be enacted, or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on our business, financial condition, results of operations and cash flows. The Government of India had announced the union budget for financial year 2024 and the Finance Act, 2023 received assent from the President of India on March 31, 2023. There is no certainty on the impact that the Finance Act, 2023 may have on our business and operations or in the industry we operate in.

64. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Lead Manager have appointed Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and

global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

65. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the exchange control regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain restrictions) if they comply with the pricing guidelines and reporting requirements specified by the Reserve Bank of India. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the approval of the Reserve Bank of India will be required for such transaction to be valid.

Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as Department of Industrial Policy and Promotion) and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares a land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government of India, as prescribed in the Consolidated FDI Policy and the FEMA Rules. These investment restrictions shall also apply to subscribers of offshore derivative instruments. Neither the Consolidated FDI Policy nor the FEMA Rules provide a definition of the term "beneficial owner". The interpretation of "beneficial owner" and enforcement of this regulatory change may differ in practice, which may have an adverse effect on our ability to raise foreign capital. We cannot assure you that any required approval from the Reserve Bank of India or any other governmental agency can be obtained on any particular terms or at all.

66. Natural calamities, climate change and health epidemics could adversely affect the Indian economy and our business, financial condition, and results of operations. In addition, hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect our business, financial condition and results of operations.

Our operations including our offices may be damaged or disrupted as a result of natural calamities. Such events may lead to the disruption of information systems and telecommunication services for sustained periods. They also may make it difficult or impossible for employees to reach our business locations. Damage or destruction that interrupts our provision of services could adversely affect our reputation, our relationships with our customers, our management team's ability to administer and supervise our business or it may cause us to incur substantial additional expenditure to repair or replace damaged equipment or rebuild parts of our offices. Any of the above factors may adversely affect our business, financial condition and results of operations. India has from time-to-time experienced instances of social, religious and civil unrest and hostilities between neighbouring countries. Military activity or terrorist attacks in the future could influence the Indian economy by disrupting communications and making travel more difficult and such political tensions could create a greater perception that investments in Indian companies involve higher degrees of risk. Events of this nature in the future, as well as social and civil unrest within other countries in Asia, could influence the Indian economy and could have a material adverse effect on the market for securities of Indian companies.

67. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well as the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

68. *Changing laws, rules and regulations and legal uncertainties, including adverse application or interpretation of corporate and tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations applicable to us and our business. In such instances, and including the instances mentioned below, our business, results of operations and prospects may be adversely impacted, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. Any political instability in India, such as corruption, scandals and protests against certain economic reforms, which have occurred in the past, could slow the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well.

Additionally, the Government of India has introduced (a) the Code on Wages, 2019; (b) the Code on Social Security, 2020; (c) the Occupational Safety, Health and Working Conditions Code, 2020; and (d) the Industrial Relations Code, 2020 which consolidate, subsume and replace numerous existing central labour legislations. While the rules for implementation under these codes have not been notified, the implementation of such laws could increase our employee and labour costs, thereby adversely impacting our results of operations, cash flows, business and financial performance.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. For instance, companies can voluntarily opt in favour of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which reduces the rate of income tax payable to 22% subject to compliance with conditions prescribed, from the erstwhile 25% or 30% depending upon the total turnover or gross receipt in the relevant period. Any such future amendments may affect our other benefits such as exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability. Further, the GoI has announced the union budget for Fiscal 2024, pursuant to which the Finance Bill, 2023 ("Finance Bill"), has introduced various amendments. The Finance Bill has received assent from the President of India on March 31, 2023, and has been enacted as the Finance Act, 2023. We cannot predict whether any amendments made pursuant to the Finance Act, 2023 would have an adverse effect on our business, financial condition and results of operations. Furthermore, changes in capital gains tax or tax on capital market transactions or the sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

There can be no assurance that the GoI will not implement new regulations and policies requiring us to obtain approvals and licenses from the GoI or other regulatory bodies, or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment or change to governing laws, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent in the jurisdictions in which we operate may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. It may also have a material adverse effect on our business, financial condition, cash flows and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which could materially harm our results of operations or cash flows. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

We are unable to determine the impact of any changes in or interpretations of existing, or the promulgation of, new, laws, rules and regulations applicable to us and our business. If that was to occur it could result in us, our business, operations or group structure being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well

as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

69. Regulation of greenhouse gas emissions and climate change issues may adversely affect our operations.

Many governments are moving to enact climate change legislation and treaties at the international, national, state, provincial and local levels. Where legislation already exists, regulations relating to emission levels and energy efficiency are generally becoming more stringent. Some of the costs associated with meeting more stringent regulations can be offset by increased energy efficiency and technological innovation. However, if the current regulatory trend continues, meeting more stringent regulations is anticipated to result in increased costs, and this may have a material adverse impact on our financial condition and results of operations. Further, India and many other nations are signatories to international agreements related to climate change including the 1992 United Nations Framework Convention on Climate Change, which is intended to limit or capture emissions of greenhouse gas, such as carbon dioxide and the 2016 Paris Agreement, which extended the potentially binding set of emissions targets to all nations. Our compliance with any new environmental laws or regulations, particularly relating to greenhouse gas emissions, may require significant capital expenditure or result in the incurrence of fees and other penalties in the event of non-compliance. We cannot guarantee that future legislative, regulatory, international law, industry, trade or other developments will not negatively impact our operations and the demand for the products we sell. If any of the foregoing were to occur, our business, financial condition and results of operations may be adversely affected.

70. Our business is substantially affected by prevailing economic, political and other conditions political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

We are incorporated in and all our operations are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations and cash flows are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations and cash flows, may include:

- any increase in Indian interest rates or inflation;
- any exchange rate fluctuations;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporates;
- volatility in, and actual or perceived trends in trading activity on India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters;
- prevailing regional or global economic conditions, including in India's principal export markets;
- any downgrading of India's debt rating by a domestic or international rating agency;
- financial instability in financial markets; and
- other significant regulatory or economic developments in or affecting India or its manufacturing sector.

On February 24, 2022, Russian military forces invaded Ukraine. Although the length, impact and outcome of the ongoing military conflict in Ukraine is highly unpredictable, this conflict and responses from international communities could lead to significant market and other disruptions, including significant volatility in commodity prices and supply of energy resources, instability in financial markets, supply chain interruptions, political and social instability, changes in consumer or purchaser preferences as well as increase in cyberattacks and espionage.

To date, we have not experienced any material interruptions in our supply chain and distribution network in connection with these conflicts. We have no way to predict the progress or outcome of the conflict in Ukraine as the conflict, and any resulting government reactions, are rapidly developing and beyond our control. The extent and duration of the military action, sanctions and resulting market disruptions could be significant and could potentially have a substantial impact on the global economy and our business for an unknown period of time. Any of the abovementioned factors could affect our business, financial condition and results of operations.

In addition, any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations, cash flows and financial condition and the price of the Equity Shares.

71. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

72. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

73. The ability of Indian companies to raise foreign capital may be constrained by Indian law.

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

74. Changing regulations in India could lead to new compliance requirements that are uncertain.

The regulatory and policy environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations and policies that could affect our business in general, which could lead to new compliance requirements, including requiring us to obtain approvals and licenses from the Government and other regulatory bodies, or impose onerous requirements. The regulatory and policy environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations and policies that could affect our business in general, which could lead to new compliance requirements, including requiring us to obtain approvals and licenses from the Government and other regulatory bodies, or impose onerous requirements. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, financial condition, results of operations and prospects.

75. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.

In recent months, consumer and wholesale prices in India have exhibited increased inflationary trends, as the result of an increase in crude oil prices, higher international commodity prices, and higher domestic consumer and supplier prices. The Consumer Price Index increased from 3.4% (average) in Fiscal 2019 to 4.8% (average) in Fiscal 2020 to an estimated 6.2% (average) in Fiscal 2021 although the RBI has enacted certain policy measures designed to curb inflation, these policies may not be successful. In February 2022, hostilities between Russia and

the Ukraine commenced. The market price of oil has risen sharply since the commencement of these hostilities which could have an inflationary effect in India. Continued high rates of inflation may increase our expenses related to salaries or wages payable to our employees, raw materials and other expenses. There can be no assurance that we will be able to pass on any additional expenses to our customers or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our business, financial condition and results of operations.

76. A third-party could be prevented from acquiring control of us post this Issue, because of anti-takeover provisions under Indian Law.

As a listed Indian entity, there are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company. Under the SEBI SAST Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company subsequent to completion of the Issue. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of SEBI SAST Regulations.

77. Financial instability in other countries may cause increased volatility in Indian financial markets.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition. The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have in the past experienced substantial dislocations, liquidity disruptions and market corrections.

78. Non-Institutional Investors are not permitted to withdraw or lower their applications (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting an application and Individual investor who applies for minimum application size are not permitted to withdraw their Applications after Application/Issue Closing Date.

Pursuant to the SEBI ICDR Regulations, Non-Institutional Investors are required to pay the Application Amount on submission of the Application and are not permitted to withdraw or lower their application (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting an application. Similarly, Individual investor who applies for minimum application size can revise or withdraw their applications at any time during the Application/Issue Period and until the Application/Issue Closing Date, but not thereafter. Therefore, Non-Institutional Investors will not be able to withdraw or lower their applications following adverse developments in international or national monetary policy, financial, political or economic conditions, our business, results of operations or otherwise at any stage after the submission of their applications.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20.00 to ₹24.00 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Amount (₹)	Cumulative Quantity	Subscription
500	24.00	500	16.67%
1000	23.00	1500	50.00%
1500	22.00	3000	100.00%
2000	21.00	5000	166.67%
2500	20.00	7500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the Book Running Lead Manager, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Steps to be taken by the Bidders for Bidding:

- Check eligibility for making a Bid (see section titled "**Issue Procedure**" on page 261 of this Red Herring Prospectus);
- Ensure that you have a demat account and the demat account details are correctly mentioned in the Bid cum Application Form;

Particulars	Justification for Holding
Inventory	Inventories include raw material, WIP and finished goods. Holding period level (in days) of Inventories is calculated by dividing average inventories by cost of sales multiplied by number of days in the year/period. With the perspective to increase business operations, the company estimates inventories holding days to be around 19 days to 26 days from Fiscal 2026. This approach prioritizes a sufficient inventory buffer to meet growing demand while implementing lean inventory practices to improve overall operational effectiveness.
Trade Receivables	Trade receivables are the amount owed to the Company by customers following sale of goods on credit. The historical holding days of trade receivable has been ranging between 15 days to 22 days during Fiscal year 2022 to 2025. As per the current credit terms and in order to expand company's operations, the holding level for trade receivable is anticipated at 27 days to 32 days during Fiscal year 2026 and 2027. This includes trade receivables from existing business and proposed expansion plan of manufacturing division. This expansion of credit terms is designed to foster stronger customer relationship and drive sales growth.
Trade Payables	Past trend of Trade payables holding days has been in the ranging from 16 days to 25 days during Fiscal 2022 to Fiscal 2025. However, with additional working capital funding, our Company intends to maintain trade payable in Fiscal 2026 to Fiscal 2027 from 17 to 31 days. This strategic shift aims to enhance overall profitability by enabling the company to secure more competitive purchase prices. By shortening the time, it takes to settle payables, the company expects to improve its negotiating position with suppliers, resulting in more favourable terms and conditions for procured goods.

Our Company proposes to utilize ₹ 1500 lakhs out of the Net Proceeds in the FY 2025-26 towards our working capital requirements. The balance portion of our working capital requirement for the FY 2025-26 will be arranged from internal accruals and Net Worth.

GLOBAL ECONOMIC OVERVIEW:

Global growth is projected at 3.3 percent both in 2025 and 2026, below the historical (2000–19) average of 3.7 percent. The forecast for 2025 is broadly unchanged from that in the October 2024 World Economic Outlook (WEO), primarily on account of an upward revision in the United States offsetting downward revisions in other major economies. Global headline inflation is expected to decline to 4.2 percent in 2025 and to 3.5 percent in 2026, converging back to target earlier in advanced economies than in emerging market and developing economies.

Medium-term risks to the baseline are tilted to the downside, while the near-term outlook is characterized by divergent risks. Upside risks could lift already-robust growth in the United States in the short run, whereas risks in other countries are on the downside amid elevated policy uncertainty. Policy-generated disruptions to the ongoing disinflation process could interrupt the pivot to easing monetary policy, with implications for fiscal sustainability and financial stability. Managing these risks requires a keen policy focus on balancing trade-offs between inflation and real activity, rebuilding buffers, and lifting medium-term growth prospects through stepped-up structural reforms as well as stronger multilateral rules and cooperation.

The global economy is holding steady, although the degree of grip varies widely across countries. Global GDP growth in the third quarter of 2024 was 0.1 percentage point below that predicted in the October 2024 WEO, after disappointing data releases in some Asian and European economies. Growth in China, at 4.7 percent in year-over-year terms, was below expectations. Faster-than-expected net export growth only partly offset a faster-than-expected slowdown in consumption amid delayed stabilization in the property market and persistently low consumer confidence. Growth in India also slowed more than expected, led by a sharper-than-expected deceleration in industrial activity. Growth continued to be subdued in the euro area (with Germany's performance lagging that of other euro area countries), largely reflecting continued weakness in manufacturing and goods exports even as consumption picked up in line with the recovery in real incomes. In Japan, output contracted mildly owing to temporary supply disruptions. By contrast, momentum in the United States remained robust, with the economy expanding at a rate of 2.7 percent in year-over-year terms in the third quarter, powered by strong consumption.

Global disinflation continues, but there are signs that progress is stalling in some countries and that elevated inflation is persistent in a few cases. The global median of sequential core inflation has been just slightly above 2 percent for the past few months. Nominal wage growth is showing signs of moderation, alongside indications of continuing normalization in labor markets. Although core goods price inflation has fallen back to or below trend, services price inflation is still running above pre-COVID-19 averages in many economies, most notably the United States and the euro area. Pockets of elevated inflation, reflecting a range of idiosyncratic factors, also persist in some emerging market and developing economies in Europe and Latin America.

Where inflation is proving more sticky, central banks are moving more cautiously in the easing cycle while keeping a close eye on activity and labor market indicators as well as exchange rate movements. A few central banks are raising rates, marking a point of divergence in monetary policy.

Global financial conditions remain largely accommodative, again with some differentiation across jurisdictions (see Box 1). Equities in advanced economies have rallied on expectations of more business friendly policies in the United States. In emerging market and developing economies, equity valuations have been more subdued, and a broad-based strengthening of the US dollar, driven primarily by expectations of new tariffs and higher interest rates in the United States, has kept financial conditions tighter.

Economic policy uncertainty has increased sharply, especially on the trade and fiscal fronts, with some differentiation across countries (Figure 1). Expectations of policy shifts under newly elected governments in 2024 have shaped financial market pricing in recent months. bouts of political instability in some Asian and European countries have rattled markets and injected additional uncertainty regarding stalled progress on fiscal and structural policies. Geopolitical tensions, including those in the Middle East, and global trade frictions remain elevated.

OVERVIEW ON INDIAN ECONOMY:

INTRODUCTION

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP for Q2 FY25 is estimated at Rs. 76.60 lakh crore (US\$ 886.16 billion) with growth rate of 8.0%, compared to Rs. 70.90 lakh crore (US\$ 820.22 billion) for Q2 FY24. The growth in nominal GDP during 2023-24 is estimated at 9.6% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY24. During the period April-December 2024, India's exports stood at Rs. 27.56 lakh crore (US\$ 318.96 billion), with Engineering Goods (27.32%), Petroleum Products (14.59%) and Electronic Goods (8.19%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing.

In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

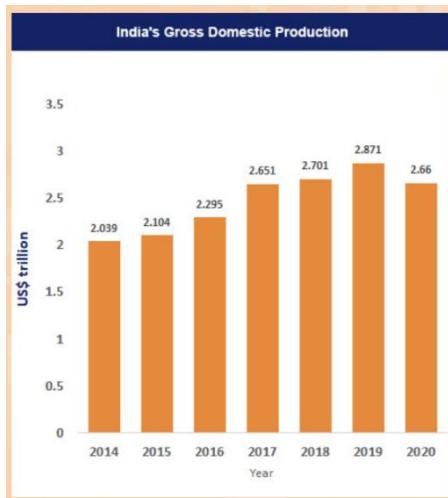

MARKET SIZE

Real GDP for Q2 of FY25 is estimated at Rs. 44.10 lakh crores (US\$ 509.36 billion) with growth rate of 5.4%, compared to Rs. 41.86 lakh crore (US\$ 484.27 billion) for Q2 of 2023-24. The growth in real GDP during 2023-24 is estimated at 8.2% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation

of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. India's Current Account Deficit (CAD) narrowed to 0.7% of GDP in FY24. The CAD stood at Rs. 96,790 crore (US\$ 11.2 billion) for Q2 of FY25 from Rs. 97,655 crore (US\$ 11.3 billion) in Q2 of FY24 or 1.3% of GDP. This was largely due to decrease in merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

- India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.
- According to HSBC Flash India PMI report, business activity surged in April to its highest level in about 14 years as well as sustained robust demand. The composite index reached 62.2, indicating continuous expansion since August 2021, alongside positive job growth and decreased input inflation, affirming India's status as the fastest-growing major economy.
- According to a report by the State Bank of India (SBI), domestic investment announcements in India have experienced a substantial increase, exceeding Rs. 37 lakh crore (US\$ 428.04 billion) in FY23 and FY24.

GOVERNMENT INITIATIVES

- Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:
- According to a report by Wood Mackenzie in January 2025, India, the United States, and West Asia are expected to collectively add 100 Gigawatts (GW) of solar capacity by 2025, while China is anticipated to continue its leadership in the solar industry.
- In July 2024, the Ministry of Finance held the Union Budget and announced that for 2024-25, the total receipts other than borrowings and the total expenditure are estimated at Rs. 32.07 lakh crore (US\$ 383.93 billion) and Rs. 48.21 lakh crore (US\$ 577.16 billion), respectively.
- In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).
- On January 22, 2024, Prime Minister Mr. Narendra Modi announced the 'Pradhan Mantri Suryodaya Yojana'. Under this scheme, 1 crore households will receive rooftop solar installations.
- On September 17, 2023, Prime Minister Mr. Narendra Modi launched the Central Sector Scheme PM-VISHWAKARMA in New Delhi. The new scheme aims to provide recognition and comprehensive support to traditional artisans & craftsmen who work with their hands and basic tools. This initiative is designed to enhance the quality, scale, and reach of their products, as well as to integrate them with MSME value chains.
- On August 6, 2023, Amrit Bharat Station Scheme was launched to transform and revitalize 1309 railway stations across the nation. This scheme envisages development of stations on a continuous basis with a long-term vision.
- On June 28, 2023, the Ministry of Environment, Forests, and Climate Change introduced the 'Draft Carbon Credit Trading Scheme, 2023'.
- From April 1, 2023, Foreign Trade Policy 2023 was unveiled to create an enabling ecosystem to support the philosophy of 'Aatmanirbhar Bharat' and 'Local goes Global'.
- To enhance India's manufacturing capabilities by increasing investment and production in the sector, the government of India has introduced the Production Linked Incentive Scheme (PLI) for Pharmaceuticals.
- Prime Minister's Development Initiative for North-East Region (PM-DevINE) was announced in the Union Budget 2022-23 with a financial outlay of Rs. 1,500 crore (US\$ 182.35 million).

- Prime Minister Mr Narendra Modi has inaugurated a new food security scheme for providing free food grains to Antyodaya Ann Yojna (AAY) & Primary Household (PHH) beneficiaries, called Pradhan Mantri Garib Kalyan Ann Yojana (PMGKAY) from January 1, 2023.

ROAD AHEAD

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and High-Frequency Indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of FY24 highlighted the unwavering support the government gave to its capital expenditure, which, in FY24, stood 37.4% higher than the same period last year. In the Union Budget of 2024-25, capital expenditure took lead by steeply increasing the capital expenditure outlay by 17.1 % to Rs. 11 lakh crore (US\$ 133.51 billion) over Rs. 9.48 lakh crore (US\$ 113.91 billion) in 2023-24. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

India's is experiencing resilient growth despite the global pandemic. India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023.

With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

GLOBAL STEEL INDUSTRY

After two years of negative growth and volatility there are some early signs of global steel demand settling in a growth trajectory in 2024 and 2025.

The global economy continues to show resilience despite facing several strong headwinds, the lingering impact from the pandemic and Russia's invasion of Ukraine, high inflation, high costs and falling household purchasing power, rising geopolitical uncertainties, and forceful monetary tightening. During the year tighter credit conditions and higher costs have led to a sharp slowdown in housing activity in most major markets, and have hampered the manufacturing sector globally. While it seems the world economy will experience a soft landing from this monetary tightening cycle, the global steel demand growth remaining weak and market volatility remaining high on lagged impact of monetary tightening, high costs and high geopolitical uncertainties.

Steel demand in China, the largest producer and consumer in the world, remained weak as the country's property sector outlook, along with construction activities, remained bleak. Further, the country's ongoing transition from an investment-stimulated to a consumption driven economic growth model is expected to limit its contribution to global steel demand growth.

India has emerged as the strongest driver of steel demand growth since 2021, and Indian steel demand will continue to charge ahead with 8% growth in its steel demand for the next few years, driven by continued growth in all steel using sectors and especially by continued strong growth in infrastructure investments. Steel demand in India is expected to be almost 70 million tonnes higher than in 2020.

Other emerging parts of the world such as MENA and ASEAN are expected to show accelerating growth in their steel demand over 2024-2025 after a significant slowdown over 2022-2023.

The developed world is also expected to show a strengthening recovery with 1.3% in 2024 and 2.7% in 2025, as steel demand may pick up in the EU in 2025 and continued resilience in the US, Japan, and Korea.

In CY 2023, world crude steel production stood at 1,892 MnT in 2023, largely flat y-o-y, according to the World Steel Association (Worldsteel), as steel producers reduced output in response to weak demand and volatile raw material costs and steel prices. China recorded production of 1,019 MnT, unchanged y-o-y while India's steel production grew 12.3% to 141 MnT. Japan's production fell 2.5% to 87 MnT while the US recorded a marginal increase to 81 MnT.

The EU, US steel demand is expected to quickly return to growth path in 2024 after a sharp drop led by housing market slowdown in 2023 thanks to strong investment activity, which received a boost from the Inflation Reduction Act and a gradual recovery in housing activity.

Steel using sector trends

Weakness in global manufacturing activity on high costs and uncertainties, tight financing conditions and weak global demand also hampered global steel demand in 2023. Leading indicators suggest the start of a recovery in global manufacturing activity in 2024. Automotive was the notable exception to overall weakness in manufacturing, as the sector finally showed the long-awaited strong recovery in 2023 on pent-up demand and easing supply chain constraints. Following a year of strong double-digit growth in all major auto producing countries, we expect to see the sector showing weak growth at best in 2024 in most of them.

Strong investment activity in manufacturing facilities and public infrastructure have underpinned global steel demand in 2023. Investment in manufacturing facilities is driven by major economies' ambition to develop strategic sectors and ensure supply security for strategic components and materials against a backdrop of increasing geopolitical tensions. The green transition of the world economy, which requires an economic transformation of unprecedented magnitude and scope, is one of the major factors behind the strength in public infrastructure investments. For example, a recent Economics Committee study estimated that global steel demand for new wind energy installations will triple by 2030 to around 30 Mt when compared with early 2020s. While the share of steel demand for wind energy installations will remain relatively low in total global demand, it may give quite a noticeable support to overall steel demand in certain regions such as Europe.

It is also important to note that public infrastructure investments aiming to reinforce infrastructure against rising climate change risks and reconstruction of areas hit by natural disasters were major factors supporting steel demand in some major steel using countries in 2023 (e.g. Japan, China, Korea, Turkey). There is continued strength in investments in public infrastructure and manufacturing facilities.

On the upside, a faster than expected disinflation accompanied by further monetary policy easing could provide a significant boost to steel using sectors, particularly housing construction. An acceleration in global decarbonisation efforts or in efforts to strengthen public infrastructure against rising climate change risks are significant positive risks that can support global steel demand going forward.

On the downside, any further escalation in geopolitical tensions, inflationary pressures proving more persistent than expected, and high and rising public debt levels triggering fiscal consolidation in major economies are significant risks that certainly have the potential to slowdown the ongoing economic recovery or even derail it.

INDIAN STEEL INDUSTRY

INTRODUCTION

One of the primary forces behind industrialization has been the use of metals. Steel has traditionally occupied a top spot among metals. Steel production and consumption are frequently seen as measures of a country's economic development because it is both a raw material and an intermediary product. Therefore, it would not be an exaggeration to argue that the steel sector has always been at the forefront of industrial progress and that it is the foundation of any economy. The Indian steel industry is classified into three categories - major producers, main producers, and secondary producers.

India is the world's second-largest producer of crude steel, with an output of 125.32 MT of crude steel and finished steel production of 121.29 MT in FY23.

India's domestic steel demand is estimated to grow by 9-10% in FY25 as per ICRA.

India's steel production is estimated to grow 4-7% to 123-127 MT in FY24.

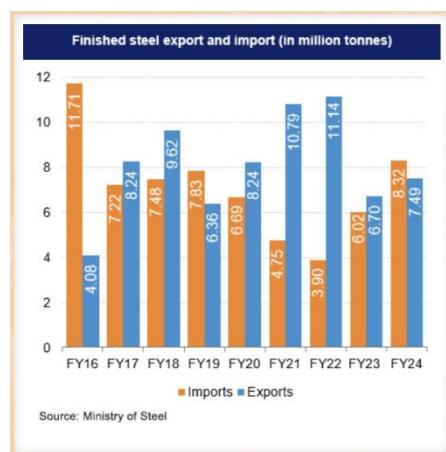

The growth in the Indian steel sector has been driven by the domestic availability of raw materials such as iron ore and cost-effective labour.

Consequently, the steel sector has been a major contributor to India's manufacturing output.

The Indian steel industry is modern, with state-of-the-art steel mills. It has always strived for continuous modernisation of older plants and up-gradation to higher energy efficiency levels.

According to a Deloitte report the demand for steel in India is projected to grow significantly over the next decade, with annual growth rates expected to range from 5% to 7.3%.

MARKET SIZE

In the past 10–12 years, India's steel sector has expanded significantly. Production has increased by 75% since 2008, while domestic steel demand has increased by almost 80%. The capacity for producing steel has grown concurrently, and the rise has been largely organic.

In April-October 2024, crude steel production in India stood at 84.94 MT.

In April-October 2024, finished steel production stood at 82.65 MT.

In FY25 (April-October), the consumption of finished steel stood at 85.71 MT.

In April-September 2024 exports of finished steel stood at 2.32 metric tonnes (MT), while imports stood at 4.70 MT.

In FY23, the production of crude steel and finished steel stood at 125.32 MT and 121.29 MT, respectively.

In FY24, the production of crude steel and finished steel stood at 143.6 MT and 138.5 MT, respectively.

In FY23, crude and finished steel production stood at 125.32 MT and 121.29 MT, respectively. In July 2023, crude steel production in India stood at 11.52 MT.

In FY24, the consumption of finished steel stood at 135.90 MT. The per-capita consumption of steel stood at 86.7 kgs in FY23.

In FY22, the production of crude steel and finished steel stood at 133.596 MT and 120.01 MT, respectively. The consumption of finished steel stood at 105.751 MT in FY22. In FY23, the consumption of finished steel stood at 119.17 MT. In April-July 2022, the production of crude steel and finished steel stood at 40.95 MT and 38.55 MT, respectively.

In FY23, exports and imports of finished steel stood at 6.7 MT and 6.02 MT, respectively. In FY22, India exported 11.14 MT of finished steel. In April 2024 exports of finished steel stood at 5.1 lakh metric tonnes (LMT), while imports stood at 5.9 LMT. In FY24, the exports and imports of finished steel stood at 7.49 MT and 8.32 MT, respectively.

The annual production of steel is anticipated to exceed 300 million tonnes by 2030-31. By 2030-31, crude steel production is projected to reach 255 million tonnes at 85% capacity utilisation achieving 230 million tonnes of finished steel production, assuming a 10% yield loss or a 90% conversion ratio for the conversion of raw steel to finished steel. With net exports of 24 million tonnes, consumption is expected to reach 206 million tonnes by the years 2030–1931. As a result, it is anticipated that per-person steel consumption will grow to 160 kg.

- The Government of India raised import duty on most steel items twice, each time by 2.5% and imposed measures including anti-dumping and safeguard duties on iron and steel items.

ROAD AHEAD

The steel industry has emerged as a major focus area given the dependence of a diverse range of sectors on its output as India works to become a manufacturing powerhouse through policy initiatives like Make in India. With the industry accounting for about 2% of the nation's GDP, India ranks as the world's second-largest producer of steel and is poised to overtake China as the world's second-largest consumer of steel. Both the industry and the nation's export manufacturing capacity have the potential to help India regain its favourable steel trade balance.

The National Steel Policy, 2017 envisage 300 million tonnes of production capacity by 2030-31. The per capita consumption of steel has increased from 57.6 kgs to 74.1 kgs during the last five years. The government has a fixed objective of increasing rural consumption of steel from the current 19.6 kg/per capita to 38 kg/per capita by 2030-31. As per Indian Steel Association (ISA), steel demand will grow by 7.2% in 2019-20 and 2020-21.

Huge scope for growth is offered by India's comparatively low per capita steel consumption and the expected rise in consumption due to increased infrastructure construction and the thriving automobile and railways sectors.

Our Business Process

At the heart of our company's business process is a customer-centric approach, designed to meet the diverse and specific needs of our clients. We operate with a key focus on flexibility, precision, and efficiency, ensuring that our products are delivered with close to 100% accuracy in terms of specifications, along with timely delivery, logistical support, and flexible credit terms. One of the distinguishing features of our business model is that we impose no minimum order quantity, allowing us to cater to businesses of all sizes, from small enterprises to large industrial clients. This approach fosters strong customer relationships and promotes repeat business.

Our business process flow:

1. Daily Inventory Broadcast

Our business process starts each day with a digital broadcast of our inventory to customers. This broadcast includes detailed information about product availability, specifications, sizes, and quantities in stock. We leverage advanced digital communication platforms to ensure that our inventory updates are distributed in real-time to our customer base, allowing them to make informed purchasing decisions quickly and efficiently.

2. Customer Requisition

Once the daily inventory broadcast is sent out, our customers review the available stock and send their requisitions to us based on their specific needs. These requisitions typically include details such as the product type, required specifications (grade, size, dimensions), and the desired quantity.

3. Order Fulfilment

If the product is not readily available in inventory, we schedule it for production based on the final specifications and upon delivery, the final invoice is generated, and payment is processed as per the agreed-upon terms.

We follow two distinct approaches for managing customer requirements and processing purchase orders:

1. Standard Procedure:

Typically, we begin by sharing an updated parity chart along with the revised basic rates with our customers. Based on this information, customers assess their needs and provide us with their specific requirements. If our rates align with the customer's expectations and requirements and our current inventory holding and upcoming production plan, then the customer's requirement is approved.

2. Key Customers Procedure:

For our key customers, the process differs slightly. In these cases, customers first submit their specific requirements to us. We then prepare and provide a tailored quotation based on their needs which is communicated to them via mail. If the quotation is satisfactory and meets their expectations, the customer proceeds by placing an affirmation to us to go ahead with the same.

Sales & Marketing Strategy

Our sales and marketing efforts are primarily focused on fostering strong, long-term relationships with our customers, while continually identifying new opportunities to expand our customer base. By strategically aligning with our customers, we aim to secure continuous orders, ensuring a smooth and consistent flow of business. Our B2B model facilitates direct engagement with brokers and dealers, allowing for efficient transactions and quicker collection of receivables, which improves our cash flow.

Pricing for our products is determined based on a variety of factors, including market demand, production capacity, transportation costs, inventory levels, competitors' pricing strategies, and applicable credit terms. Regional factors, such as local regulations and tax policies, also play a role in price setting. To ensure competitive pricing, our sales team continuously evaluates these factors and adjusts minimum pricing levels accordingly. Additionally, the team devises promotional schemes, offers, and discounts to enhance our market competitiveness and drive sales.

We believe that maintaining flexibility in pricing, while safeguarding our margins, allows us to remain adaptable in a dynamic market environment. Our emphasis on customer-centric strategies and efficient operational processes ensures that we deliver value to our customers while fostering sustainable growth for our business.

Competition

We operate in a highly competitive environment where our competitors, both organized and unorganized, may have greater financial and operational resources. While key differentiators such as product quality, brand value, and distribution network play a significant role in the decision-making process of our clients, reliability and competitive pricing are often the decisive factors in securing business.

We face competition from both established industry players and emerging entities. However, we believe that our experience, proven reliability, and established relationships with customers provide us with a significant competitive advantage. Although the market is competitive, the number of competitors offering services similar to ours remains limited, particularly in terms of the breadth and quality of our offerings.

Our ability to compete effectively is underpinned by our commitment to delivering high-quality products, maintaining strong client relationships, and offering competitive pricing. We are well positioned to respond to evolving market conditions and increase our market share. As demand for our products continues to grow, we anticipate that competition will intensify. However, we are confident in our ability to compete vigorously, leveraging our deep industry knowledge, customer trust, and operational excellence to manage our growth optimally.

Furthermore, we recognize that the competitive landscape is influenced by multiple factors, including changing market dynamics, pricing strategies, established supplier and customer relationships, and brand recognition. By continuing to innovate and adapt to market shifts, we are well-equipped to face the challenges posed by both organized and unorganized competitors, and to capitalize on emerging opportunities to strengthen our market position.

It also seeks to simplify the law relating to the transfer of ownership of trademarks by assignment or transmission and to bring the law in line with international practices.

Copyright Act, 1957 (“Copyright Act”)

The Copyright Act, 1957, along with the Copyright Rules, 1958, (collectively, “Copyright Laws”) governs copyrights subsisting in original literary, dramatic, musical or artistic works, cinematograph films, and sound recordings, including computer programmes, tables and compilations including computer databases. Computer programme constitutes a literary work under Indian law and is afforded copyright protection and the owner of such computer programme becomes entitled to protect his works against unauthorized use and misappropriation of the copyrighted work or a substantial part thereof. Any act of this nature entitles the copyright owner to obtain relief from a court of law including injunction, damages and accounts of profits. Further, copyright registration is not a prerequisite for acquiring or enforcing a copyright in an otherwise copyrightable work and once registered, copyright protection remains valid until expiry of sixty years from the demise of the author. Reproduction of a copyrighted computer programme for sale or hire or trade exhibit in public or distribution or commercial rental, offer for sale or commercial rental, issuing copy(ies) of the computer programme or making an adaptation of the work without consent of the copyright owner amounts to infringement of the copyright. However, the Copyright Act prescribes certain fair use exceptions which permit certain acts, which would otherwise be considered copyright infringement.

The Patents Act, 1970 (“Patents Act”)

The Patents Act, 1970 (“Patents Act”) governs the patent regime in India. Being a signatory to the Agreement on Trade Related Aspects of Intellectual Property Rights, India is required to recognize product patents as well as process patents. In addition to the broad requirement that an invention satisfy the requirements of novelty, utility and non-obviousness in order for it to avail patent protection, the Patents Act further provides that patent protection may not be granted to certain specified types of inventions and materials even if they satisfy the above criteria. Section 39 of the Patents Act also prohibits any person resident in India from applying for a patent for an invention outside India without making an application for a patent for the same invention in India. The term of a patent granted under the Patents Act pursuant to Section 53 is for a period of twenty years from the date of filing of the application for the patent. A patent shall cease to have effect if the renewal fee is not paid within the period prescribed for the payment of such renewal fee. While the Patents Act prohibits patentability of a ‘computer programme’ as such, computer programmes in combination with novel hardware could be considered patentable depending on the substance of the invention and applicable provisions of the Patents Act. Computer programmes on their own are excluded from patent

protection and are protected as a literary work under the Copyright Laws. In terms of the Patent Act, the patentee holds the exclusive right to prevent third parties from the using, offering for sale, selling or importing for such purposes, the patented product or product obtained directly by a process patented in India.

Designs Act, 2000

The Design Act, 2000 came into force in May 2001 to consolidate and amend the law relating to protection of designs. A design refers to the features of shape, configuration, pattern, ornamentation or composition of lines or colours applied to any article, in two or three dimensional or both forms. In order to register a design, it must be new and original and must not be disclosed to the public anywhere in India or any other country by publication in tangible form or in any other way prior to the filing date. A design should be significantly distinguishable from known designs or combination of known designs in order for it to be registerable.

Customs duties are administrated by Central Board of Indirect Tax and Customs under the Ministry of Finance, GoI.

Cash Flows from Investing Activities

For the period ended May 31, 2025, net cash used in investing activities was ₹-5.97 lakhs, a significant improvement compared to the higher outflow of ₹-449.15 lakhs in March 31, 2025. The lower outflow reflects limited capital expenditure during the shorter reporting period.

In the fiscal year ended March 31, 2025, net cash used in investing activities was ₹-449.15 lakhs, a substantial increase compared to ₹-10.88 lakhs in March 31, 2024. This was primarily driven by higher investments in long-term assets and infrastructure expansion.

In March 31, 2024, the net cash used in investing activities was ₹-10.88 lakhs, lower than ₹-76.24 lakhs in March 31, 2023. The decline indicates reduced capital spending, as the company prioritized asset optimization over fresh investments.

Cash Flows from Financing Activities

For the period ended May 31, 2025, net cash used in financing activities was ₹-68.83 lakhs, compared to a significant inflow of ₹434.01 lakhs for the year ended March 31, 2025. The outflow during the shorter period reflects repayments of borrowings and reduced financing inflows.

In the fiscal year ended March 31, 2025, net cash generated from financing activities was ₹434.01 lakhs, marking a reversal from an outflow of ₹-736.32 lakhs in March 31, 2024. This was largely supported by fresh borrowings and financing arrangements during the year.

In March 31, 2024, net cash used in financing activities was ₹-736.32 lakhs, compared to a net inflow of ₹507.07 lakhs in March 31, 2023. The sharp decline was mainly due to higher repayments of borrowings and a reduction in financing activities.

For the fiscal year ended March 31, 2023, net cash generated from financing activities was ₹507.07 lakhs, reflecting higher borrowings, in contrast to the significant repayments and outflows that marked earlier periods.

Net Increase/ (Decrease) in Cash and Cash Equivalents

For the period ended May 31, 2025, there was a marginal net decrease in cash and cash equivalents of ₹-0.10 lakhs, compared to a decrease of ₹-0.39 lakhs in March 31, 2025. The minor change highlights a balance between operational inflows and financing/investing outflows during the period.

In the fiscal year ended March 31, 2025, the net decrease in cash and cash equivalents was ₹-0.39 lakhs, compared to a marginal increase of ₹0.06 lakhs in March 31, 2024. This reflects the pressure of higher investing outflows despite financing inflows.

For the fiscal year ended March 31, 2024, there was a net increase in cash and cash equivalents of ₹0.06 lakhs, compared to a net decrease of ₹-2.38 lakhs in March 31, 2023, indicating better overall cash management and positive operating cash flows.

In March 31, 2023, the net decrease in cash and cash equivalents was ₹-2.38 lakhs, reflecting the combined impact of operating outflows and higher investing and financing activities during the year.

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the risk of loss related to adverse changes in market prices, including interest rates. In the normal course of business, we are exposed to certain market risks including interest risk.

Interest rate risk

Interest rate risk results from changes in prevailing market interest rates, which can cause a change in the fair value of fixed-rate instruments and changes in the interest payments of the variable-rate instruments. Our operations are funded to a certain extent by borrowings. Our current loan facilities carry interest at variable rates as well as fixed rates. We mitigate risk by structuring our borrowings to achieve a reasonable, competitive cost of funding. There can be no assurance that we will be able to do so on commercially reasonable terms, that our counterparties will perform their obligations, or that these agreements, if entered into, will protect us adequately against interest rate risks.

Liquidity risk

Adequate and timely cash availability for our operations is the liquidity risk associated with our operations. Our Company's objective is to all time maintain optimum levels of liquidity to meet its cash and collateral requirements. We employ prudent liquidity risk management practices which inter-alia means maintaining sufficient cash and the availability of funding through an adequate amount of committed credit facilities.

Credit Risk

We are exposed to the risk that our counterparties may not comply with their obligations under a financial instrument or customer contract, leading to a financial loss. We are exposed to credit risk from our operating activities, primarily from trade receivables. We consider our customers to be creditworthy counterparties, which limits the credit risk, however, there can be no assurance that our counterparties may not default on their obligations, which may adversely affect our business and financial condition.

Significant economic changes that materially affected or are likely to affect income from continuing operations.

Case 1: Wellplan Tradelink Pvt. Ltd. (Assessee) – Corporate Promoter (Assessment Year 2008–09)

Total Demand Involved: ₹6,50,20,283

The assessee, a private limited company engaged in the business of trading in shares and securities, filed its return of income electronically on 13.08.2008 for Assessment Year (AY) 2008–09, declaring NIL income. The case was subsequently reopened by issuance of notice under Section 148 of the Income Tax Act, 1961 ("the Act"), and an order under Section 143(3) was passed on 29.04.2010, raising a demand of ₹2,271.

On examination of records, the Assessing Officer (AO) observed that the assessee had raised a total share capital (including share premium) of ₹11,12,00,000 by issuing 2,22,400 equity shares of ₹10 each. The Commissioner of Income Tax, exercising suo motu revisionary jurisdiction under Section 263 of the Act, passed an order on 11.03.2013, terming the AO's order as erroneous and prejudicial to the interest of the Revenue. The matter was remanded back with directions to conduct a fresh assessment with detailed verification regarding the source of the share capital and share premium.

In the fresh proceedings, notices under Section 142(1) were issued, but were not duly served due to incorrect address details. However, on 21.03.2014, Ms. Megha Goenka, Authorized Representative of the assessee, appeared and submitted limited information. The AO directed the assessee to produce the directors/subscribers for verification, but the assessee failed to comply. Consequently, the AO completed the assessment under Section 144 of the Act, making an addition of ₹11,12,00,000 under Section 68 for unexplained share capital and share premium, and ₹9,400 under Section 14A. Total demand of ₹6,50,20,283 was raised inclusive of interest.

The assessee preferred an appeal before the Commissioner of Income Tax (Appeals) [CIT(A)] challenging the additions under Sections 68 and 14A. Despite notices, the assessee did not appear or submit written arguments. The ld. CIT(A) passed an **ex parte** order relying on the decision of the Hon'ble Supreme Court in *H.M. Esufali H.M. Abdulali* [(1973) 90 ITR 271 (SC)], dismissing the appeal.

The assessee is currently in appeal before the Hon'ble Income Tax Appellate Tribunal, contesting the addition of ₹11,12,00,000 under Section 68 and ₹9,160 under Section 14A. However, no appearance has been made, nor any documentary evidence or written submissions filed in support of the claims. Upon hearing the Departmental Representative and perusal of records, the Tribunal found no error in the CIT(A)'s findings. The Tribunal held that the assessee failed to discharge the onus of proving identity, creditworthiness of the subscribers, and genuineness of the share transactions. Accordingly, the appeal was dismissed and the addition was upheld.

Case 2: Shri Ajaykumar Balwantrai Mittal – Promoter Director

Demand Raised: ₹3,26,825

The demand of ₹2,79,700, relating to the Assessment Year 2021–22, has been raised under Section 154 of the Income Tax Act, 1961, pursuant to a rectification order dated 26th February 2025, on account of an apparent error in the record. The said demand has been revised to ₹3,26,825, inclusive of interest on the outstanding amount, and remains outstanding.

Case 3: Ms. Dhruvi Kapadia – Director

Demand Raised: ₹9,605

The demand has been raised for ₹9,302 for Assessment Year 2024–25 under Section 143(1)(b) of the Income Tax Act, 1961, vide intimation dated 24.02.2025. The same pertains to prima facie adjustments made during summary processing of return under the centralized processing center (CPC). The said demand has been increased to ₹9,605, inclusive of interest on the outstanding amount, and remains outstanding.

For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Issue Price and cut-off

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, the FDI Policy, FEMA and rules and regulations made thereunder. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the RBI and the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (“DPIIT”).

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT has issued a consolidated FDI Policy, which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases, and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government has also enacted Foreign Exchange Management (Non-debt Instruments) Rules, 2019 and Foreign Exchange Management (Debt Instruments) Regulations, 2019 in supersession of Foreign Exchange Management (Transfer or Issue of Security by a Person Resident Outside India) Regulations, 2017 and the Foreign Exchange Management (Acquisition and Transfer of Immovable Property in India) Regulations, 2018. Consequent to the Foreign Exchange Management (Non-Debt Instrument) Rules, 2019, the Reserve Bank has issued the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instrument) Regulation, 2019 which governs the mode of payment and reporting requirements for investment in India by a person resident outside India.

As per the FDI Policy, FDI in companies engaged in the trading sector is permitted up to 100% of the paid-up share capital of such company under the automatic route.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue. For further details, see the chapter titled “**Issue Procedure**” on page 261.

Investment by Foreign Portfolio Investors (FPIs)

FPIs are permitted to subscribe to Equity Shares of an Indian Company in a public issue without the prior approval of the RBI, so long as the price of the Equity Shares to be issued is not less than the price at which the Equity Shares are issued to residents. SEBI-registered FPIs have been permitted to purchase shares of an Indian company through the issue, subject to total FPI investment being within the individual FPI investment limit of below 10% of the total paid-up equity capital of the Indian Company on a fully diluted basis, or less than 10% of the paid-up value of each series of debentures or preference shares or share warrants issued by an Indian company and the total holdings of all FPIs put together, including any other direct and indirect foreign investments in the Indian company by the FPIs permitted under Foreign Exchange Management (Non-debt Instruments) Rules, 2019, shall not exceed 24% of the paid-up equity capital of the Indian company on a fully diluted basis. However, this aggregate limit of 24% may be increased up to sectoral cap/statutory ceiling, as applicable, by the Indian company concerned by passing a resolution by its Board of Directors followed by passing of a special resolution to that effect by its general body.

With effect from April 01, 2020, the aggregate limit shall be the sectoral caps applicable to the Indian company as laid out in sub-paragraph (b) of paragraph 3 of Schedule I of the Foreign Exchange Management (Non-debt Instruments) Rules, 2019, with respect to its paid-up equity capital on a fully diluted basis or such same sectoral cap percentage of paid-up value of each series of debentures or preference shares or share warrants. The aggregate limit as provided above may be decreased by the Indian company concerned to a lower threshold limit of 24% 49% or 74% as deemed fit, with the approval of its Board of Directors and its General Body through a resolution and a special resolution, respectively before March 31, 2020. The Indian company which has decreased its aggregate limit to 24% or 49% or 74%, may increase such aggregate limit to 49% or 74% or the sectoral cap or statutory ceiling respectively as deemed fit, with the approval of its Board of Directors and its General Body through a resolution and a special resolution, respectively; however, once the aggregate limit has been increased to a higher threshold, the Indian company cannot reduce the same to a lower threshold.

Investment by Non-Resident Entities in India under FDI Policy 2020:

The FDI Policy 2020 provides that a non-resident entity can invest in India, subject to the FDI Policy except in those sectors/activities which are prohibited. However, an entity of a country, which shares a land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, can invest only under the Government route. Further, a citizen of Pakistan or an entity incorporated in Pakistan can invest, only under the Government route, in sectors/activities other than defence, space, atomic energy, and sectors/activities prohibited for foreign investment. In the event of the transfer of ownership of any existing or future FDI in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the restriction/purview as mentioned herein, such subsequent change in beneficial ownership will also require Government approval. The same is in line with the Press Note No. 3(2020 Series) dated April 17, 2020, as issued by the Department for Promotion of Industry and Internal Trade, Ministry of Commerce & Industry, Government of India and Foreign Exchange Management (Non-debt instrument) Amendment Rules, 2020 notified by Central Government through a notification dated April 22, 2020, in order to curb opportunistic takeover/acquisition of Indian Companies due to current COVID-19 pandemic conditions.
